DETAILED ACTION

Election/Restrictions

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the antisense sequences referred to in claim 10 are subject to restriction. The Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, up to 10 independent and distinct nucleotide sequences will be examined in a single application. See MPEP 803.04 and 2434. Although a first Office action on the merits has been issued in this Application, restriction to one sequence is proper for the reasons given below.

Claim 1 specifically claims distinct antisense molecules by reciting distinct intended target regions. Said antisense molecules are considered to be unrelated, since each antisense sequence claimed is structurally and functionally independent and distinct for the following reasons: each antisense sequence has a unique nucleotide sequence, and each antisense, upon binding to its target, functionally modulates (increases or decreases) the expression of the gene to varying degree (per applicants' Table 1 in the specification). A proper search would therefore require searching all individual target sequences for antisense molecules that may bind and inhibit the target sequence of SEQ ID NO: 3. However, a search of more than one (1) such sequence, presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed sequences. In view of the foregoing, one (1) sequence is considered to be a reasonable number

of sequences for examination. Accordingly, applicants are required to select a total of one (1) antisense sequence from claim 1 above.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
